DETAILED ACTION

The communication of June 9, 2006 is hereby acknowledged.

35 U.S.C. § 102

The rejection of claim 1 under 35 U.S.C. 102(b) has been withdrawn in view of Applicant's response dated June 9, 2006.

Applicant admits that the commercial sales of the variety did not occur more than one year before the filing date of the present application. The standard set under *In re Elsner*, 72 USPQ2d 1038 (CA FC 2004) states "the foreign sale must not be an obscure, solitary occurrence that would go unnoticed by those skilled in the art. Its availability must have been known in the art, just as a printed publication must be publicly available" (1043). Applicant admits that the earlier averment that commercial sales of 'Tikvio' took place in 1998 (response dated April 12, 2002) was made in error. Those distributions were not public and were for testing and trial purposes only.

Since the distributions were not public, this would indicate that Applicant did not sell the plant to wholesalers, retailers or others more than one year prior to the filing date in the U.S. Applicant admits that the earlier averment was made in error and therefore does not enable the publication. As such, it does not constitute prior art under 35 U.S.C. 102(b).

Reasons for Allowance

The following is an Examiner's statement of reasons for allowance:

The information regarding the cultivar Tikvio was described in the European Community Plant Breeder's Right application number, 19981017, and published on October 15, 1998. The printed publication was accessible to the public more than one year prior to the filing date of this instant application. A publication relied upon as prior art under 35 USC 102(b) must be enabling. The text of the relied upon publications standing alone would not enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior art, must enable one of ordinary skill in the art to obtain or reproduce the plant. See *In re LeGrice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could obtain and

reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure.

In the response dated June 9, 2006, Applicant states the claimed plant has not been sold or available to the American public anywhere in the world prior to the filing in the United States. However, the standard is not the "American" public. Enablement of a publication is not required to occur for the "American" public. Sale anywhere in the world coupled with a publication of the plant wherein the sale and publication occurred more than a year prior to filing, constitutes a statutory bar under 102(b) if one of ordinary skill in the art could have obtained and propagated the plant more a year prior to filing and wherein the sale was not isolated or solitary. The printed publication cannot be enabling more than one year prior to filing because the disclosed cultivar was not propagated or obtained from publicly available materials.

The specification provides as complete a botanical description as is reasonably possible of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
